PAVIS CONNECT **INTERFACE TO EIDOPAT / EIDOLOGIC**

- Maximum convenience - the smart interface
- The most secure way of transferring data
- Fully automatic, real-time communication

PAVIS CONNECT

Ongoing digitization and increasing data complexity bring further challenges to corporate IP departments and IP law firms. At the same time, companies are trying to focus on their core issues and free up resources. For this reason, **PAVIS focuses specifically on process automation and on simple and secure data transfer.**

DEVELOPING PAVIS CONNECT – THE SMART INTERFACE

Interface with all common IP Management Systems

PAVIS has developed the **leading technology** for xml-based interfaces

Fully automatic, real-time communication

More **comfortable:** It enables more secure processes and saves valuable time.

LONG-STANDING COOPERATION BETWEEN PAVIS AND EIDOLOGIC

Innovative IP management system based on **workflows, knowledge-based applications and interfaces** to international patent & trademark offices.

Ergonomic **graphical user interface** with convenient drag & drop function.

Software with modular structure: modules for an easily adaptable IP management system.

Automation of recurring processes, interfaces to MS Word + email clients, currency updates via internet.

Automatic monitoring of payment deadlines included.

Online transfer of data from PAVIS

USING THE CONNECT FUNCTIONALITIES FROM WITHIN THE CLIENT'S IP MANAGEMENT SYSTEM

Import | entering new IP rights, triggering new orders

History | Information on the status of all previous payment orders for each individual IP right

Preview | Information on due date, type of IP right, year, costs

Receipt | Receipt extract for all collective receipts, normal receipts via history module

Budget | Information on all future due dates and costs of an IP right

Cancellation | Convenient cancellation of a pending order

OVERVIEW OF BENEFITS FOR PAVIS CLIENTS

Automation of all mandatory administrative processes and reduction of manual effort to a minimum

01 **No manual** exchange of Excel or xml files

02 **No** sending of emails **back and forth**

03 **Direct transfer** without intermediate steps: reducing administrative effort and error risks

04 **More scope** for making corrections through automatic checks and feedback from the system in case of ambiguous IP rights data

05 **Saving time** through automated data transfer and order placement

06 **Synchronized** databases

07 **Raising data protection standards** through particularly secure data transfer

08 **Improved data quality** through immediate processing, feedback and status query for each case in the IP management system

SOON TO BE INTEGRATED INTO PAVIS CONNECT

- EP Validations
- Data verification
- Transmission of cost files
